概率论系列报告

报告题目(Title)：Hunt's hypothesis (H) and Getoor's conjecture

报告人(Speaker)：　胡泽春　副教授 南京大学

时间(Time)：　3 月 17 日(周一)下午 3:00-4:00

地点(Venue)：北京大学理科一号楼 1479

摘要(Abstract)：This talk contains four parts. First, I will recall the meaning of Hunt's hypothesis (H) and its importance. Second, I will introduce Getoor's conjecture and the existing results. Third, I will present our results. Finally, I will mention some problems. The talk is based on joint works with Wei Sun and Jing Zhang.
